

Rosalyn Shen

Creative Technologist

📍 Brooklyn, New York ✉️ rosshen1202@gmail.com [in linkedin.com/in/rosalynshen](https://www.linkedin.com/in/rosalynshen)

Creative Technologist with experience in workflows for cinematic visualization, environment development, and virtual production pipeline, translating visual direction into technical workflows for film and immersive media production.

EDUCATION

New York University
B.S. + M.S. Integrated Design & Media

08/2021 - Expected 05/2026
Brooklyn, NY

GPA: 3.917

Minor: Business, Entertainment, Media, and Technology (BEMT)

SKILLS

Virtual Production & Real-Time Workflows: LED wall integration (Unreal Engine nDisplay) | Camera synchronization | Motion capture pipeline (OptiTrack Motive, MotionBuilder)

Previs & Visual Development: Unreal Engine 5 (Environment, Lighting, Sequencer) | Cinematic scene assembly | Storyboard translation | Visual storytelling

3D & Visual: Cinema 4D + Redshift | Substance 3D Designer | Maya + Arnold

Other Tools: Adobe Creative Suite (After Effects, Photoshop, Illustrator, InDesign) | DaVinci Resolve | Live2D Cubism + VTube Studio | Reaper | Procreate | Nomad

Languages: Chinese | English | Japanese

SELECTED PROJECTS

Project Lead & Virtual Production Artist
Collaborative Virtual Production Short Film

11/2025 - 12/2025

A six-person virtual production short integrating motion capture, UE5 environments, and LED wall filming.

- **Leadership & Coordination:** Initiated and led interdisciplinary planning and coordinated workflow across pre-production, shoot, and post-production.
- **Visual Direction:** Directed storyboards, visual tone, and 3D environment development to establish a cohesive visual language for world-building and cinematic planning.
- **Technical Pipeline Integration:** Operated a real-time production workflow connecting OptiTrack, MotionBuilder, and Unreal Engine for motion capture, character retargeting, and live scene synchronization.
- **On-Set Virtual Production Support:** Synchronized Unreal Engine environments with the LED wall and tracked camera movement for live-action background capture.
- **Post-Production:** Edited the final piece and designed soundtrack and SFXs to support narrative rhythm and emotional tone.

Art Co-Director / Cinematic Artist
Immersive Narrative Game Project in Unreal Engine 5

01/2026 - 04/2026

A narrative game project focused on environmental storytelling, cinematic experience, and interactive interface design.

- **Visual Development:** Co-directed visual tone and supported environment building, lighting, and scene polish.
- **Cinematic Scene Design:** Built in-game cinematic sequences to enhance narrative pacing and visual continuity.
- **Interface & Presentation:** Designed visual interface elements that supported clarity and overall scene presentation.
- **Technical Collaboration:** Implemented UI-related Blueprint logic to seamlessly connect interaction flows with aesthetic designs, bridging the gap between art direction and technical execution.

Creator / Experience Designer
Original Character Immersive Installation Project

09/2024 - 12/2024 | 02/2026 - 05/2026

An independent project combining fictional worldbuilding, web interface prototyping, Live2D, and character interaction design.

- **Narrative System Design:** Developed an original character and fictional media framework, turning concept into an interactive audience-facing experiential installation.
- **Interface Prototyping:** Built a browser-based fictional research terminal using HTML, CSS, and JavaScript.
- **Character Pipeline Development:** Designed and rigged a Live2D character model and used Python with VTube Studio to trigger responsive visual states.
- **End-to-End Execution:** Led the project from concept development to technical prototyping and final exhibition, combining visual design, storytelling, and implementation.
