

Rosalyn Shen

Multimedia Designer / Interactive Experience Designer

📍 Brooklyn, New York ✉️ rosshen1202@gmail.com 🔗 [linkedin.com/in/rosalynshen](https://www.linkedin.com/in/rosalynshen) 🌐 rosalynshen1202.com/#/creative-tech

Multimedia designer with experience in interactive systems, visual communication, and experience design. Skilled at translating concepts into engaging experiences in digital, spatial, and narrative media.

EDUCATION

New York University

B.S. + M.S. Integrated Design & Media

08/2021 - Expected 05/2026

Brooklyn, NY

GPA: 3.917

Minor: Business, Entertainment, Media, and Technology (BEMT)

SKILLS

Interactive Design & Prototyping: Interaction design | interface design | Figma | HTML/CSS/JavaScript | Python

Visual Communication & Multimedia: Adobe Creative Suite (After Effects, Photoshop, Illustrator, InDesign) | visual storytelling | campaign design | presentation design

Creative Technology & Experience Design: Unreal Engine | Live2D Cubism + VTube Studio | interactive installations (Arduino + P5js) | audience-facing systems

3D & Motion: Cinema 4D + Redshift | Maya + Arnold | DaVinci Resolve | Reaper | Procreate | Nomad

Other: Real-time workflows with LED wall implementation, camera synchronization, and motion capture system

Languages: Chinese | English | Japanese

EXPERIENCE & PROJECTS

Visual Communication Designer & Events Coordinator

05/2025 - 08/2025

Yiyang Shiguang Senior Wellness Center (under Beijing Anyone Senior Wellness Industry Development Co., Ltd.)

A senior wellness center brand focused on community programming, outreach, and in-person services for older adults.

- **Brand Communication:** Designed all visual communication contents including posters, flyers, social media covers, and presentation materials to support both public outreach and internal communication.
- **Audience-Centered Design:** Adapted communication materials for older adult users, with attention to clarity, accessibility, and community-facing engagement.
- **Cross-Team Collaboration:** Worked closely with social media and operations teams to align visual assets and event communication with campaign goals.
- **Event Planning & Execution:** Supported the planning and rollout of in-person promotional activities, connecting design work with real-world user engagement.
- **Brand Consistency:** Maintained a cohesive visual identity across print, digital, and on-site communication materials.

Interactive Exhibit Designer

02/2025 - 05/2025

Intrepid Museum Accessibility Design Project

A collaborative exhibition design project reimagining a WWII Sick Bay treatment room as an accessible, multisensory experience.

- **Multisensory Experience Design:** Co-developed two interactive concepts for the treatment room, including a projected suturing simulation and a tactile medical kit station combining video, sound, scent, and touch.
- **Accessibility Strategy:** Integrated tactile, audio, scent, and visual access features, including Braille, raised QR codes, large-print transcripts, vibration feedback, and inclusive reach/height considerations.
- **Prototyping & Testing:** Iterated physical and digital prototypes in response to projection interference, tactile usability, and accessibility testing across users with varied heights and visual abilities.
- **Spatial & Visitor Experience Planning:** Helped shape visitor flow and interaction logic for a historically constrained exhibition space, balancing immersion, clarity, and usability.

Creator / Experience Designer

09/2024 - 12/2024 | 02/2026 - 05/2026

Original Character Immersive Installation Project

An independent project combining fictional worldbuilding, web interface prototyping, Live2D, and character interaction design.

- **Narrative System Design:** Developed a fictional media framework, turning it into an interactive experiential installation.
- **Character Pipeline Development:** Designed a Live2D character model and used Python to trigger responsive visual states.
- **Interface Prototyping:** Built a browser-based fictional research terminal using HTML, CSS, and JavaScript.
- **End-to-End Execution:** Led the project from concept development to technical prototyping and final exhibition, combining visual design, storytelling, and implementation.
